

Building Envelope Council Ottawa Region

Jacques was the Director of Building Research at CMHC through the 80's and 90's when the Building Science industry started to come into existence. He was responsible for the development of existing CMHC technical guidelines for residential buildings. He worked with other building research groups at NRCC, PWGSC, & NRCAN and architectural and engineering firms and contractors in the private sector, to establish best practice guides for the residential sector. He put CHMC on the map internationally for their technical guidance to cold weather design and construction. He was a founding member of both OBEC (1986) and BECOR in 1988. His unwavering commitment to research and technology transfer found a perfect fit to the mandate of BECOR. He put the full resources of his department to the establishment of BECOR. Within the first five years BECOR generated considerable cash surplus to allow to comfortably carry out its mandate without financial pressures. He was always a figure larger than life itself as demonstrated by his infectious personality and incredibly loud laugh. It is fitting that one of his gifts to BECOR is the Brag Session format. It started as a self-promotion session generally set for the month of December that included an open bar and refreshments.

Register on-line using BECOR's new web site: [Upcoming Events – BECOR](#)
